ALL ADSD DISTRICT MANAGERS & AREA MANAGERS

Gentlemen:

Earlier this month, I sent you a copy of Bill Lanning's October 8th note on Leviton's recall of their CO/ALR switches asking for additional feedback from your people.

Skip Shaffer, in Akron, learned at Novazny Electric of a fire in Texas and in the Washington, D.C. area where Leviton's CO/ALR devices were used.

The main point is people are still having trouble with aluminum wire. Secondly, and perhaps more important, is the fact we always hear of Leviton and their fine quality, never having problems. They are just like any other manufacturer, occasionally having problems with their product.

I'd appreciate your passing this information on to your sales engineers.
